• Turkic languages (SOV, agglutinative, vowel harmony)			
	Kazakh	Tatar	Kumyk
	population of speakers		
number pronunc primary secondary	8M-12M /qazaq/ Kazakhstan China, Mongolia	5.4M /tɒtɑr/ Tatarstan	430K /qumuq/ Dagestan
	external influences	5	
Mongolic Oghuz Persian	moderate —	light light heavy	light moderate
Russian	heavy heavy	heavy	heavy heavy

## ...... Morphological transducers ......

- Take a surface form, and produce valid lexical form(s)
- Take a lexical form, and produce valid surface form(s) ал<v><tv><ifi><p1><sg>, 'алдым' алд<n><px1sg><nom>
- ......Transducers for Turkic languages.....
- Turkish (Çöltekin, 2010; Öflazer, 1994)
- Crimean Tatar (Altıntaş, 2001)
- Turkmen (Tantuğ et al., 2006)
- Kyrgyz (Tyers et al., 2012) GPL (=free and open)!

### ..... Framework: HFST

- Reimplementation of Xerox FST formalisms (lexc and twol)
- Also provides a wrapper around popular free/opensource FST toolkits: SFST, OpenFST, and Foma ..... Development effort.....

### .... Morphological & orthographical words ....

- өнүктүрөбүзбү? 'will we develop [it]?' ӨНҮК<v><tv><caus><aor><pl>><pl>+бы<qst>
- келатсаң 'if you come'
  - Keл<v><iv><prt impf>+жат<vaux><gna cnd><p2><sg>
- ...Irregular [noun + possessive + case] forms...
- Some combinations of possessive and case morphemes are distinct (i.e., not formed simply by concatenation):

case	form	1SG	2SG	3SP
nom	<u>—</u>	-(I)M	-(I)ң	-(S)I
acc	-NI	-(І)мдІ	-(I)ңдI	-(S) <b>І</b> н
gen	-NIH	-(І)мдІн	-(І)ңдІн	-(S)IнIн
loc	-DA	-(І)мдА	-(І)ңдА	-(S)ІндА
abl	-DAн	-(І)мдАн,	-(I)ндAн,	-(S) <b>І</b> нАн
		-(І)мАн	-(І)ңАн	
dat	-GA	-( <b>I</b> ) <b>MA</b>	-(І)ңА	-(S) <b>І</b> нА

- Trade-off:
- morphophon. complicateder, morphotactics simpler
- underlying form used: {S}{I}{n}
- phonological rules delete {n}, {S} by context

### 

one type of N-N compunds: N2 has <px3> and related morphology

LEXICON N-INFL-3PX-COMPOUND %<n%>:%>%{S%}%{I%}%{n%} GEN-POS ;

LEXICON Nouns

аба% ырайы:аба% ырай N-INFL-3PX-COMPOUND ;

"weather"

чакыруу% кагазы:чакыруу% кагаз N-INFL-3PX-COMPOUND ; ! "invitation"

francis.tyers@uit.no

### ...... Desonorisation .........

<prn>

<qnt>

<itg>

• {N} desonorises to д after a consonant алма- $\{N\}\{I\}$   $\rightarrow$  алманы 'apple-ACC'  $cыp-{N}{I} → cырды 'secret-ACC'$ 

Transitive

Plural

Third person

<tv>

<p3>

•  $\{L\}$  desonorises to  $\pi$  after cons. of sonority  $\leq l$ сыр- $\{L\}\{A\}$ р → сырлар 'secret-PL' кыз- $\{L\}\{A\}p \rightarrow$  кыздар 'girl–PL'

"L Desonorisation"

%{L%}:д <=> :VoicedLowSonCns %>:

"N Desonorisation"

%{N%}:д <=> :VoicedCns %>: ;

### 

• Turn {y} into a harmonised high vowel when a vowel doesn't follow the following consonant:  $myp{y}H \rightarrow mypyh 'nose'$ 

 $мур{y}H+{I}M \rightarrow мурдум 'my nose'$ 

%{y%}:Vy <=> [ :LastVowel :Cns\* :Cns ]/[:0] \_\_ [ :Cns [ .#. | :Cns ] ]/[ :0 | %>:] ; where Vy in (иүииүыыууыуу) LastVowel in (иүеэөяаёоыюу) matched ;

### ......й+vowel letters........

- [ a o y ] become [яёю] after й and й deletes
- й incorporated into the context of many rules
- + separate rules to change the characters
- + a rule to delete the original й

"Deletion of й before yoticised vowels" й:0 <=> \_ [ :YotVow ]/[ :0 | %>: ] ;

- Part of Apertium Turkic project:
- http://wiki.apertium.org/wiki/Apertium Turkic
- Transducers available live at turkic.apertium.org Source code available from apertium's svn repo

• split into	10 ec	iual parts: cove	erage calculated over each

- separately; standard deviation of mean calculated
- ..... Coverage measures ....... Naïve coverage - percentage of surface forms in a given corpus receiving  $\geq 1$  analysis

(surface forms may have missing analyses)

**Mean ambiguity -** average number of analyses for each surface form found in analysed corpus

Coverage results (as of r36739)			
Language	Corpus	Tokens	Coverage (%)
Kazakh	Wikipedia News Religion Average	25.6M 3.8M 851K –	$85.61 \pm 1.37$ $92.12 \pm 2.72$ $92.49 \pm 1.66$ $90.07 \pm 1.91$
Tatar	Wikipedia News Religion Average	159K 5.2M 382K –	$86.35 \pm 2.17$ $89.75 \pm 0.07$ $91.25 \pm 2.55$ $89.12 \pm 1.60$
Kumyk	Wikipedia News Religion Average	286K 227K –	$91.10 \pm 0.86$ $92.47 \pm 1.03$ $91.78 \pm 0.94$

selected 1000 surface forms at random from RFE/RL corpus, proof read analyses

..........Precision & recall.........

- **Precision** (of a form's analyses % correct): 97.32%
- **Recall** (percentage of analyses provided by the transducer that are correct for a form, by comparing against a gold standard): 94.56%
