# Categorisation

- morphologically distinct adjective classes
- most sources: adjectives can be used substantively and adver-
- Other Turkic transducers: 0-derivation (overgenerates)
- but not all adjectives have all of the following: comparative forms, substantive readings, adverbial readings
- Our approach: categorisation
- only correct forms are analysed and generated

A1 A2 A3 A4	ʻgood' ʻold' ʻdead' ʻbasic'	яхшы (яхшырак) иске (искерәк) үле (—) төп (—)	яхшы (яхшырак) иске (искерәк) үле (—) — (—)	яхшы (яхшырак) — (—) — (—) — (—)

### Ongoing and future work

- Disambiguation, more stems, clean up transducers
- Machine translation between these languages
- Bring other Kypchak transducers to comparable performance: Qaraqalpaq, Bashqort, Nogay, Crimean Tatar
- Other Turkic lgs: Uzbek, Uyghur, Chuvash, Yakut, Tuvan, etc.
